## DEPRESSION / ALCOHOL DEPENDENCE

My name is Brian. I am 57 years old and I live in West Sussex. I would like to share with you the benefits I have received from taking MAXIMOL SOLUTIONS.

I have suffered for many years from depression due to various medical and surgical episodes that have affected me in various ways. My depression continued through conventional treatments and psychiatric help, eventually turning to drinking spirits and then dependence upon alcohol. The effect on those around me was not pleasant to behold. With the support of family, doctor, friends and counsellors (I was lucky), I made a conscious decision to do something about it. My craving for alcohol continued but I managed to ignore it.

In February I was given an audio tape called 'The Fulvic Phenomenon'. I listened to it several times and then decided to try MAXIMOL. The effects in my case were almost immediate; my sleep was undisturbed and all my cravings for alcohol ceased within six weeks. My whole being seemed to have been helped. I have a much more positive attitude, feel more tolerant and my depression has gone completely. I like myself now, where once I disliked myself immensely; am alive and taking joy in my family once more and can cope positively with life again.

I am not medically or nutritionally qualified but common sense shows me that MAXIMOL provides all that I need to combat the invasion of diseases, increase my body's ability to heal itself and help to maintain itself in good condition.

MAXIMOL has given me the 'Solutions' to make 'Neways' in my mental and physical well-being. I had nothing to lose – but have gained plenty!!!

Thank you, and good health.

## CLINICAL DEPRESSION

Dear Martin

Just a note to say "Thank You" for introducing me to Neways, and the incredible transformation to my life in just five weeks.

When we met I was in the midst of a six-year bout of clinical depression, unable to make the simplest of decisions, such as whether to get up out of bed or stay there all day. I was popping pills all day to try and keep it together. I tried to hurt myself and cut my arms on more than one occasion.

During the worst period I was on twenty-one pills per day and was eventually admitted to a psychiatric unit and taken away from my children. I suffered from the shakes, as well as panic and anxiety attacks. Often I would not dare leave my room and venture outdoors.

A few weeks ago you sent me the "Fulvic Phenomenon" tape. I listened to it and decided right then to try the MAXIMOL Solutions.

After just six days taking MAXIMOL I felt so good that I decided to stop taking all my medication. My husband said "no", but he did not know how well I felt. I went ahead and stopped taking everything except MAXIMOL.

I went from strength to strength, losing some of the weight that I had put on during my illness. I had no depression whatsoever. I could think clearer and my memory improved.

You then told me about the programme, and how Neways products have helped many, many people. So I decided to become a distributor and help others. Guess who was my first customer? My own Health Visitor!

Once again thanks for introducing me to Neways and helping me change my life.
