

## HEALTHY INFO TESTIMONIALS

### Tired, depressed and headaches every day.

I have been in Neways for 6 years. I was sent a tape in the post and at that point I was tired, gloomy and menopausal and spending a fortune attending a natural health clinic in Wimbledon. After 3 months of using, and having fantastic results with Maximol Solutions, I then added Revenol and gradually noticed that the headaches I had suffered from all my life had disappeared.

Prior to using Revenol, some months I used to take 30 to 40 painkillers and had to have a packet by my bed, in my handbag, at the office I now rarely get a headache and I know it is because I take Revenol every day. I will take this for the rest of my life.

### MULTIPLE SCLEROSIS

I am writing to you as promised to let you know of the profound effect both REVENOL and MAXIMOL SOLUTIONS have been having on me over the last few months.

In January this year MRI Scans indicated that I was suffering from Multiple Sclerosis. The symptoms had been getting markedly more apparent over six or seven years with my left leg giving increasing trouble. As a result, mobility had been difficult and I have had great hardship in walking.

Then I started taking the tablets! In January of this year I started taking a regular course of REVENOL and MAXIMOL four tablets of REVENOL a day for fourteen days, then two a day since, and two capsules of MAXIMOL a day. After just fourteen days I felt much better in myself and continued to improve since. My walking has greatly improved and also the pain in my knee has almost disappeared! I no longer have to get up during the night and feel the benefit of a good night's sleep after what has been a very long time.

Proof that I now feel a new man again is that I booked three holidays this year Majorca in May, France in June and Malta in September. Not bad for a gentleman aged seventy seven!

Thank you Neways for giving me a new lease of life.

### HEARING / ASTHMA / WARTS / DIABETES

I am semi diabetic due to a works accident in 1991. I also had 4 kidney operations in 1995, resulting in going to pass water 8 or sometimes 10 times in the night. I lost my hearing in my right ear in 1996 and I have a hearing aid. I also suffer from asthma. Two months ago I was diagnosed diabetic.

Three weeks ago a relative suggested I complement my diet with MAXIMOL and REVENOL. The results were remarkable after 2 days my hearing returned to 100 per cent. I no longer have painful, frightening asthma attacks and I only get up to go to the loo perhaps once or twice in the night.

Also, I had an embarrassing wart at the bottom of my neck, about the size of a five pence piece. After 3 weeks taking MAXIMOL and REVENOL it has completely disappeared. I must add that I was late in placing my second order and the attacks started to come back. My general wellbeing has improved, and so has my eyesight. The diabetes symptoms such as dizziness, fuzzy head, balance and coordination have also slightly improved. Vitality and vigour have also improved.

A number of people have remarked on how well I look and this has given me my self pride back. These products have helped me and I will take them for the rest of my life.
